

In-Home Mold Investigation Worksheet

Name: _____ Date: _____ Class: _____

Purpose

Investigate your home to identify locations where mold could potentially grow. Use biological evidence to support your conclusions. Observe only—do not touch or disturb suspected mold.

Safety Reminders

- Observe only; do not touch suspected mold.
- Do not move heavy furniture or appliances.
- Do not enter unsafe areas such as attics, roofs, or crawl spaces.
- Ask a parent or guardian before completing the investigation.

Evidence Collection

Location	Conditions Observed	Risk (L/M/H)	Biological Evidence	Prevention	Photo?

Reflection

1. Which location had the highest mold risk? Why?

2. Which condition was most important for mold growth?

3. What surprised you during this investigation?

4. Describe two ways to reduce mold growth in your home.

Claim-Evidence-Reasoning

Claim: Which room is most susceptible to mold growth?

Evidence:

Reasoning:
